

## The FNEI Conservation Program

Five Nations Energy Inc. (FNEI) is introducing a conservation program for Attawapiskat, Kashechewan and Fort Albany to help reduce the amount of electricity you use and save on your hydro bill. The FNEI Conservation Program will help improve indoor air quality and mold issues. Using less electricity also helps combat the effects of climate change. Check subsequent bills for energy saving tips.

The FNEI Conservation Program encourages conservation by:

- Offering tips on reducing electricity use
- Installing energy efficiency products like low flow showerheads, faucet aerators and pipe wrap
- Hiring and training local people to install the energy efficient products
- Conducting energy audits and retrofits in some homes in your community

## PARTICIPATE TO WIN

Submit an energy conservation tip for a chance to win an energy efficient prize for your home. To enter your conservation tip visit FNEI Conservation Program Facebook page and become a Friend. You may also mail your tip to FNEI Conservation Tip, 36 Birch Street South, Timmins, Ontario P4N 2A5.

**The FNEI Conservation Program is a partnership between Five Nations Energy Inc., Ontario Power Authority and the Mushkegowuk Environmental Research Centre. Find out more about FNEI by visiting [www.fivenations.ca/](http://www.fivenations.ca/) and by becoming a Facebook friend of the FNEI Conservation Program.**
