

## **FNEI Conservation Program**

Reducing the amount of electricity you use saves money on your monthly bill and is also good for the environment. The less electricity you use, the more you help combat the impact of climate change.

### **Energy Saving Tips for Lighting**

- Turn off lights when not in use.
- Replace incandescent lamps, (i.e. regular light bulbs) with compact fluorescent lights. While more expensive to purchase, they pay for themselves over time. They last up to 10 times longer and use up to 75 per cent less energy.
- Outdoor lights with motion sensors operate only when they detect movement, providing home security as well as energy savings.

### **How Do You Conserve Energy?**

Send us your best energy conservation tip and if it is deemed energy smart we will send you an energy efficient product for your home. Submit your conservation tip at [www.fivenations.ca](http://www.fivenations.ca) or visit our FNEI Conservation Program Facebook page and become a friend. You may also mail your tip to FNEI Conservation Tip, 36 Birch Street South, Timmins, Ontario P4N 2A5.

**The FNEI Conservation Program is a partnership between Five Nations Energy Inc., Ontario Power Authority and Mushkegowuk Environmental Research Centre.**
